

Tunnell Consulting Establishes New Presence in Cambridge, Massachusetts

Known as a thriving community of innovation, Tunnell's newest office places the firm in one of the most influential life sciences hubs in the country

KING OF PRUSSIA, PA and CAMBRIDGE, MA, January 28, 2020: Tunnell Consulting, an organization dedicated to solving complex problems for life sciences companies and government agencies, announced that the firm has established a presence in Cambridge, Massachusetts, one of the largest life sciences hubs in the country. Tunnell's Cambridge office will be in the Cambridge Innovation Center (CIC), at One Broadway in the heart of Kendall Square. The CIC is a vibrant, collaborative workspace for startups, entrepreneurs and the region's most rapidly-growing innovators.

"It is vitally important for Tunnell to have a physical presence in the country's most important life sciences hubs," said Maryann Gallivan, President and CEO of Tunnell Consulting. "Our King of Prussia, Pennsylvania headquarters means we are an active member of Pennsylvania's thriving life sciences community. However, as we continue to grow as a company, it is important for us to expand our presence to other areas of innovation. The Cambridge Innovation Center is the perfect spot for Tunnell's expansion. The facility is filled with biopharmaceutical leaders and startups working on fascinating next-generation projects and rapidly-growing companies like Tunnell, and we look forward to being an active member of the CIC community."

Approximately half of the CIC's tenants are life science and biotech companies at various stages of growth, from startups to global corporations. "CIC is very excited to welcome Tunnell Consulting to CIC Cambridge," said Corey Wade, Senior Relationship Manager. "Given their expertise in the life sciences, they will be a great addition to the CIC ecosystem."

Tunnell's thought leaders offer decades of direct industry experience and expert guidance to some of the world's most influential pharmaceutical, biotech and life sciences companies, government agencies and other innovators in the industry. Three of Tunnell's consultants will work out of the Cambridge office, including Maryann Gallivan, President and CEO; and Principals Bill Connell and Scott Myers.
